GitHub: github.com/kiransundhesha18 | Location: India

PROFESSIONAL SUMMARY

Commercially focused Entry-Level Data Analyst skilled in Power BI, Advanced Excel, and SQL. Experienced in architecting Star Schema data models, Power Query ETL pipelines, and executive dashboards that deliver actionable business insights and optimize operational performance.

CORE TECHNICAL COMPETENCIES

- Business Intelligence: Power BI, DAX Measures, Power Query, Star Schema, KPI Dashboards
- Spreadsheets: Advanced Excel, XLOOKUP, Dynamic Arrays, PivotTables, What-If Modeling
- Database & SQL: Relational Queries, JOINs, Aggregate Functions, GROUP BY, Data Hygiene
- Analytics: Variance Analysis, Cohort Retention, Supply Chain Diagnostics, Unit Economics

FEATURED PORTFOLIO PROJECTS

1. IPL Franchise Valuation & Player ROI Analytics [Power BI & DAX]

- Modeled Rs. 1,192 Cr auction spend across 10 franchises with Power Query ETL.
- Engineered 14+ custom DAX measures for Cost-Per-Run and Cost-Per-Wicket ROI.
- Built 4-quadrant scatter matrices pinpointing 18+ undervalued draft steals.

2. Enterprise Retail & Supply Chain Performance Suite [Advanced Excel]

- Analyzed 185K+ transaction rows with automated multi-tab Excel financial engine.
- Modeled regional logistics SLA breaches and return-to-origin courier penalties.
- Simulated 35% reduction in stockout risk via automated reorder threshold triggers.

3. Cohort Retention & Customer LTV Analysis [SQL & Relational Databases]

- Executed complex relational JOINs and aggregations across customer purchase logs.
- Identified 45-day retention cliff and modeled repeat buyer transaction frequency.

EDUCATION & CREDENTIALS

- Comprehensive Data Analytics & Business Intelligence Program [Completed 2026]
- Hands-on Case Studies in Power BI, SQL Queries, and Financial Spreadsheet Modeling
